Proposed next steps for implementation of AEGIS

Jan Engels and Lorenzo Maggioni
AEGIS/ECPGR Coordinator

Tenth Meeting of the ECPGR Forages Working Group 28-29
April 2010; Poel, Germany
Content of presentation

1. Selecting MAAs
   - Separate presentation!

2. Development of AQUAS elements
   - Introduction
   - Principles
   - Operational framework
   - Technical elements, incl. draft template for genebank manual (see handout)
   - Capacity building and oversight
   - Implementation workplan (see handout)

3. The way forward

Tenth Meeting of the ECPGR Forages Working Group 28-29 April 2010; Poel, Germany
Establishing AQUAS

Introductory note:

• Steering Committee agreed with approach (see Quality System for AEGIS discussion paper)

• Paper also includes agreed principles, operational framework, technical elements, capacity building and oversight mechanism

• SC agreed with proposed implementation steps
AQUAS - Principles

Quality system to be based on the principles:

1. Quality assurance
   - **Plan**: Say what you do
   - **Do**: Do what you say
   - **Check**: Let an independent body check that you do what you say
   - **Act**: Correct and improve what you say you do

2. Decisions by **consensus**

3. Agreed minimum standards – involve partners; get “buy-in”

4. Capacity building plays a key role

5. Avoid unnecessary **bureaucracy** (pragmatic; not doctrinaire)

6. Effective **guidance and advisory approach** as monitoring

Tenth Meeting of the ECPGR Forages Working Group 28-29 April 2010; Poel, Germany
Technical elements

Elements to be established (see also workplan):

1. **Operational genebank manual** – all AEGIS Associate Members; based on genebank template (seed genebank draft available; comments are solicited; no detailed discussion foreseen)

2. **Generic operational standards** – Secretariat (based on manuals and suggestions by WGs; cooperation with FAO)

3. **Agreed minimum technical standards** – all WGs (complementing generic standards; crop specific)

4. **Quality management system**, incl. procedures to develop it – Secretariat; all WGs; Associate Members:
   a. record keeping
   b. reporting
   c. monitoring (not policing, but guiding and advisory approach)

Tenth Meeting of the ECPGR Forages Working Group 28-29
April 2010; Poel, Germany
Capacity building and oversight

Capacity building:

1. If standards are not met —> capacity building (in agreement and possible support from National Coordinator)
2. In case funds are not available locally, or through projects (AEGIS Advisory Committee to assist)
3. Where applicable, training courses and/or on-the-job training to be organized at Network or Programme level

Oversight:

1. First level monitoring of implementation of AQUAS by WGs
2. Second level monitoring across WGs by AEGIS AC
3. AEGIS AC to oversee implementation of AQUAS

Tenth Meeting of the ECPGR Forages Working Group 28-29 April 2010; Poel, Germany
Operational framework - 1

Partners and their major roles/outputs:

1. ECPGR Secretariat:
   1. Prepare draft template for genebank manual
   2. Draft generic operational standards

2. Working Groups or NCGs:
   1. Draft minimum standards by crop
   2. Organize reporting system
   3. Organize/implement the monitoring system
Operational framework - 2

3. AEGIS Advisory Committee
   1. Comment on draft generic standards
   2. Approve template
   3. Comment on minimum standards (ensure “equal treatment” between crops)

4. ECPGR Steering Committee:
   1. Approve generic and technical standards
   2. Approve reports
   3. Decide on issues / capacity building recommendations

Tenth Meeting of the ECPGR Forages Working Group 28-29 April 2010; Poel, Germany
5. Associate Members:
   1. Adopt standards,
   2. prepare genebank manual,
   3. keep records,
   4. write reports, and
   5. adopt monitoring system
AQUAS – where are we?

• Discussion paper endorsed by SC; on the AEGIS website (has been distributed)
• Ample discussions (at least for some crops)
• Agreed timeframe and process as well as responsibilities for its development
• Further “fine tuning” in EUROGENEBANK Project was planned; now to be done without additional support

• “New item” (part of EUROGENEBANK Project preparation): need for some sort of certification (of an accession or collection; a genebank; a genebank operation?)
• ISO, AEGIS or what kind of certification?
• A pre-condition to allow rationalization of collections to take place!??
The way forward - WGs

1. Comment on draft template for genebank manual requested (now)

2. Testing the final template: any legume/forage specific genebank interested to test it out and prepare genebank manual (June)?

3. Comment on generic technical standards (summer 2010)

4. Initiation of process to develop crop specific technical minimum standards (from August onwards)
   a. Collecting
   b. Regeneration
   c. Drying and other preparatory steps
   d. Storage/field genebank maintenance
   e. Seed quality and viability monitoring

Tenth Meeting of the ECPGR Forages Working Group 28-29 April 2010; Poel, Germany
Thank you for your attention!
