Date of compilation: 27.02.2023.

1. CONTRIBUTION TO ECPGR OBJECTIVES

1.1. Achievements and success stories

- To efficiently conserve and provide access to unique germplasm in Europe through AEGIS and the European Collection
  n/a

- To provide passport and phenotypic information of actively conserved European PGRFA diversity ex situ and in situ through the EURISCO catalogue
  All accessions included in EVA Maize network have been evaluated, characterized and genotyped and the data are will be included in EURISCO catalogue
  - To improve in situ conservation and use of crop wild relatives
    n/a
  - To promote on-farm conservation and management of European PGRFA diversity
    n/a
  - To promote use of PGRFA

Activities of EVA Maize Network and use of maize genetic resources were promoted at the XXV EUCARPIA Maize and Sorghum Conference, held in June 2022 in Belgrade, Serbia.

1.2. Gaps or constraints identified

Most of the members from the Maize WG are involved and participate in the EVA Maize network. A public-private partnership is established and collaboration with maize breeding company is very valuable and productive. Since private companies are not getting any funds, it would be important to support part of their activities in order to attract more companies and to have better and wider utilization of maize genetic resources, since their number in national genebanks is much higher than their use through the EVA network.
2. **Grant Scheme Activities, WG Meetings and EVA Activities**
